

File-Mate 1500 Annual License

What is an annual license?

The annual license gives you the ability to run the latest version of File-Mate 1500 Professional on a single workstation. It gives you access to all software updates and version upgrades, at no additional cost, when they become available. Plus you will receive prioritized tech support, moving any question, problem or request to the top of the list.

What are the benefits of the annual license?

- **Saves you money** – Compared to the one-time license, you will save over 50%.
- **Predictable pricing** – Know how much the software will cost, and know when it will be billed making it easy to stay in your budget.
- **Always run the current release** – Get immediate access to the new releases at no additional cost during your contract period.
- **Priority tech support** – Move to the top of the list whenever you have a question or problem.

How does the license work?

You are automatically billed a single fee of \$60 every 12 months that will renew your contract for the 12 months following your renewal date. During this contract period you will have access to all the privileges of the annual license contract.

At the end of your annual license contract, you have the 3 options:

- Renew on an additional one year contract at the current annual price.
- Buy a standard or Professional one-time license.
- De-install your contract software.

If we don't hear from you we will automatically renew your contract for an additional year.

You can cancel at any time. But upon canceling you are required to de-install the software, or purchase a one-time license to continue using the software. There is no refund of unused time on a canceled contract.
